- **Coursework:** Data Structures and Algorithms, Computer System Security, Language Design and Compilers

Ventura College, General Education — July 2022

- **Coursework:** Object Oriented Programs, Computer Organization & Architecture

Skills

Languages: Java, C#, JavaScript, HTML, SQL

Frameworks and Tools: Node.js, React, Git and Github, PostgreSQL, Firebase, Maven, AWS

Work Experience

Consultation Agent, Geek Squad – Oxnard, CA — November 2025 – Present

- Diagnose and troubleshoot hardware, software, and network issues on Windows/macOS based computers
- Assist clients in resolving technical problems by providing troubleshooting support, identifying the cause of the issue, and walking them through solutions.
- Perform data migrations and system setups, ensuring all software and firmware are up to date and configured to client specifications.
- Install, configure, and troubleshoot peripheral devices, such as printers, monitors, and audio equipment.

Shift lead, Walgreens – Oxnard, CA — Jan 2019 – July 2022

- Key holder position and managing a 2-4 person team, as well as addressing any and all customer concerns.
- Balancing registers, balancing the safe, making cash deposits and logging it all in both paper and in the Walgreens system.
- Created merchandise displays and worked on store resets according to company planograms and promotions
- Unloaded and organized weekly truck deliveries and restocked shelves, keeping inventory accurate.

Projects

JavaEsque | Custom Compiler — `github.com/jameys127/JavaEsque-Language`

- Developed a fully functional Java-like object oriented programming language that was built in Java and compiles to JavaScript
- Implemented features like: class-based inheritance, subtyping, method overriding, and validating return paths.
- Built a website with a text editor to demonstrate the compiler. Hosted on AWS Lambda for the backend compiler and AWS Amplify for the front end website built using React.

CateredToYou | Senior Design Project Android App — `github.com/jameys127/cateredtoyou`

- Collaborated in a 5 person team developing a logistics and operations management app for catering companies to streamline event planning, task delegation, inventory tracking, and delivery coordination
- Built the notification system that had both immediate and timed notifications and a page to view archived ones.
- Designed auto-complete functionality for inputs in the OpenStreetMap GPS delivery tracking.

Personal Portfolio Website — `github.com/jameys127/PersonalPortfolio`

- Developed a full-stack portfolio website to showcase projects, featuring a private admin dashboard for managing content
- Built the frontend with React and the backend with Node.js, Express.js, and PostgreSQL.
- Implemented secure authentication and authorization using JSON Web Tokens for the admin dashboard
- Deployed the application on AWS EC2 and integrated Amazon S3 for image storage
